

Bryan Jude - Historian Personal Statement

FSA has been a big part of my first two years of experience in college. I have been involved in community gathering as well as having been part of ASF and volunteering for ASF. I have participated in events such as Friendship games and I have also preformed in PCC with PDT and other events.

I am applying for the position of Historian because I have a great desire to take photos. Taking photos is a hobby and also an addiction. I love snapping pictures and with all the FSA events I feel that photography, as a hobby will be beneficial for this position. Taking pictures is an addiction in which I take seriously because I constantly want to take pictures until they are perfect.

If I am elected to this position, my goal is capture the moments that make FSA. As a historian, I would like to capture the emotions that everyone feels when the event is happening and capture why people participate in FSA. I'll be at every event to support and document what is happening. Memories will be captured for the future members and attendants of these events who can relive the experience with the photos of each event. Knowing the history of FSA will add to its future identity because without knowing the past events it is like not knowing yourself. With each Kodak moment I would bring the community closer together.

I was part of the student council in my sophomore through my senior year of high school. During sophomore year I was the secretary, junior year I was vice president, and senior year I was co-president. I have worked at a gift shop at Long Beach Marriot from the end of my sophomore year until the summer before college. Working, going to school and having other responsibilities have helped me in learning to prioritize and also to manage my time more efficiently. The experience working at this gift shop has made me a more independent responsible person. Working for my old boss I felt like I was their personal assistance, because when they went on vacation they would put me in charge of their business. I was in charge of going to the bank to make deposits, I made sure there was change for the register, and I made sure the inventories were always in stock.
